NAME: GW-AC60 fully automatic hollow coil winding machine

MACHINE INTRODUCTION:

The GW-AC60 model adopts the latest manufacturing process, which is more stable in winding, disconnect, and the phenomenon of running positions has decreased significantly. Optimize the design of mechanical structure, improve the overall performance of the mechanical, and further reduce the repeated positioning

GREWIN INDUSTRIAL GROUP CO.,LTD.

Add: The fourth floor A-A3 zone aviation business area, Dongli Distr, Tianjin, China.

error. Using a high -resolution servo motor, the twisting angle is more accurate. The main axis uses German technology to develop and produce, and the beating error has been further reduced to meet the high internal diameter requirements of various empty core coils. Products are widely used in various industries such as high - frequency, new energy, network transformers.

Main features:

1. Use PC control, servo power, convenient mechanical adjustment, many exercise stations, and can inject hollow coils of various shapes.
2. The upper control system adopts the international top CNC controller, high - performance dual -core CPU, Windows operation interface, 10 -inch LCD touch display, the screen is clear and intuitive, stable, easy to learn, easy to understand, easy to operate.
3. The power system is an imported high -precision servo motor, which is organically matched with the CNC control system, which has accurate synchronization, reliable control, accurate motion position, and can make high -required various empty core coil products. Essence
4. Choose a hollow coil semi -automatic peeling machine, which can achieve large - scale round line peeling and thinning

The main technical parameters:

Wire diameter:	0.8 ~ 4.5mm (according to reality)
Twist handle length:	≤45*50
The biggest work itinerary of the line shaft:	80
Roll line direction:	positive, reverse around
The minimum instruction value of the roll axis:	0.1°
The maximum instruction value of the roller shaft:	± 99 ± 359.9
The minimum setting value of the camshaft:	0.1
Maximum setting value of the camshaft:	359.9
Minimum setting value of the lifting shaft:	0.01
The maximum setting value of the lifting shaft:	100
Out of production per minute:	5-6

minutes/minute (winding)	NO
Send line servo:	
Rolling line servo:	1.5kW
Clear servo:	3.0kW
Lift servo:	1.5kW
Total power:	6.0kW
Machine size:	3200*1300*1900
Machine weight:	950kg

PRACTICAL APPLICATION :

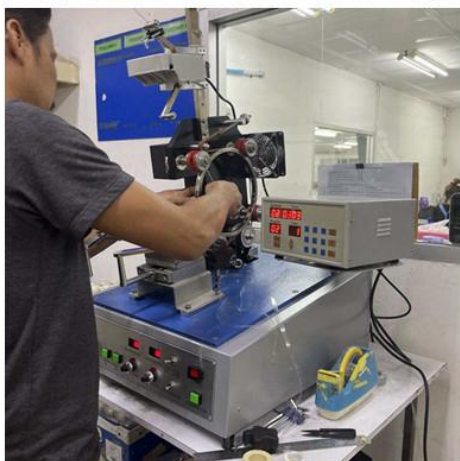

TRAINING CUSTOMER TO OPERATE WINDING MACHINE :

1.All service engineers with 10 years experience are gotten special technology training, who can deal with various breakdown problem.

2.Guide the user to use accurately and how to maintain the Hook Type Transformer Winding Machine.

Provide free consultation about production process technology of electronic products.

3.In order to guarantee the machine used normally, we'd have training on how to operate, use and maintain our product by English manual, video, guiding on line.

PACKAGING:

Packaging Material: Carton/Wooden case with foam inside.

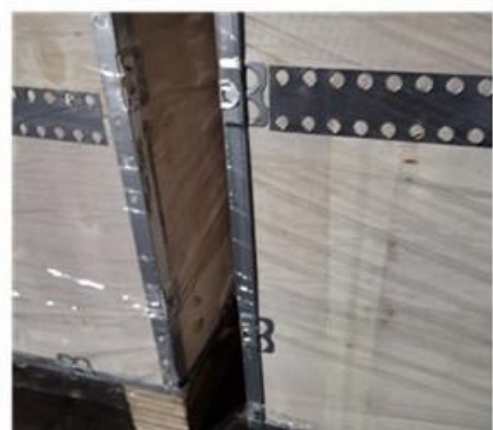

1.General package(Paper carton or plastic bag): For small equipped parts for Hook Type Transformer Winding

Machine, Package it with form and pack paper to guarantee unbroken during the transport.

2.Wooden case package: For larger scale Hook Type Transformer Winding

Machine,we have special skilled

carpenter, who would make the proper wooden case with exact thickness,density,length. The up arrow ↑marked on the outer wooden case. Buffer material would be put in the wooden case to prevent crack and shock.
